To Whom It May Concern,

This letter identifies FARO Technologies, Inc., a Florida corporation ("FARO Technologies" or "FARO"), as the sole developer and manufacturer of the FARO Focus S150 Laser Scanner, SCENE™ software and FARO Zone 3D software program. FARO is also the sole provider of hardware service, warranty, maintenance, annual calibration, and FARO Certified train the trainer programs associated with FARO Focus Laser Scanners.

The FARO S150 Laser Scanner package is a complete scan to end deliverable package for law enforcement. **The FARO S150 Scanner is the only 150+ meters Survey Grade (minimum of 1mm accuracy) scanner that does not need to be leveled after every station move.**

**The FARO S150 is the only survey grade scanner of a reasonable size and weight (10 pounds) for single user operation with a 150 meter range.** At 10 pounds, The S150 weighs less than its competitors and thus it enables a greater number of officers the opportunity to use the system in real life situations.

The components to this laser scanning system are the **S150 Scanner, processing software, and drawing software.**

**The FARO FOCUS S-Series scanner is the only scanner that produces a digital signature feature that notifies if raw scan data has been modified, prevents tampering, and increases data security and integrity.**

**FARO's software, SCENE, is the only software available that can-do Blood Spatter analysis, Suspect height determination, and shooting trajectory all within the original scanning software program. No additional software is needed to conduct these forensic applications.**

All our software is owned and optimized for use in law enforcement with our scanners. FARO also supports with validation papers on these tools, unique to the industry and will supply expert testimony when a Daubert Challenge is pursued.

With a wide variety of features, including range, image quality, Data Security, and capture speed, the S150 Laser Scanner considerably reduces the effort involved in documenting, measuring, and analyzing forensic scenes.

FARO's competitive advantage is the lightweight, affordable, precise technology delivered with each 3D laser scanning product. With FARO Technologies products, our customers are making an investment for future projects with unsurpassed cost-value, a major advantage when looking for the most cutting-edge technology that gets you the right results in an age of limited resources. With hundreds of thousands of units sold worldwide and customers around the globe, our products have been reliably measuring success throughout the world. Our forensic customers include the Department of Defense, the federal government, various intelligence organizations, the US military, and many state and municipal law enforcement agencies. Please feel free to contact us with any questions.

FARO Technologies does not sell software and or Scanners thru vendors. This package can only be purchased from FARO directly.

Kind Regards,

*Dennis Sweet*
